3. <sup>1st</sup> must if the age bureaucratic apparatus can be altered, be a well placed 10 apt, most persons occupying part of the housing density and passport and visa office expect remuneration for the life and death services which all numerous state money - to recruit persons for an apartment and official visa to live in such an apartment compulsory laws in the Soviet Union without a city "visa" stay a person good not in that city, while a portion or work in Russia or other it is very difficult process to recruit persons to move an apartment in another city through to before another city. In such instances the administrative department have may expect \$2-100 rubles for his stage of approval on a request blank for an apartment or into an apartment already occupied by one family like an expectation to leave the city for another the usual method of getting a room is apartment without having to wait, as it is no usual demand live which may take 5-6 years to receive a one room "apartment" In my bureaucratic society - class of desk administrators is always born who expect their privileges and who exploit this position for self purposes themselves in the USSR which practice place on a particularly point nature and it is not simply a matter of allowing rare services or conveniences but a matter of getting the spending things of life, a simple room, a work stamp, permission to all relative in a real city small a restricted zone such as border zone, or military zone and so on and so on. In order to receive permission to leave one zone and live in another from a universal choice a person must receive permission from the local passport agency in the city from which he is leaving and from the city to which he is going. Then he must show that he has received a place of work in Leningrad that city in which he is going as well as permission to move from the military authorities if he is military obligated from the police and security agency in case he has government or secret work. He must show that his specialty or preparation will be used on the to which he goes will affect state policy of people work and

39 photos, references, documents and notepaper declarations but the main obstacle to moving in the USSR is getting a place to live since it would be years if one simply applied for a place in Moscow. Even if one can find <sup>the</sup> friends or relatives for the time being they could rent a room from somebody, they could not work because without a living wage stamp one's "passport" is no good. It is against the law for any director or administrator of any enterprise, store, or office to give work to that person, minus without a living wage one cannot get a "work stamp", even renting a room to a person who cannot get a living wage to that room is against the law (speculating). So although moving from one city to another is quite legal now (after the war it wasn't) it is a long process of red tape, many problems and stamping against bureaucratic procedure, that is why few people actually do change cities or exchange papers right now. The structural procedure of Soviet society controls the flow of people and their occupations and hence values to the state, any Russian will tell you he can change cities or move to another city any time he wants to, the he must however he must meet certain requirements in order to receive new work and although he may indeed quite any job he likes up till 1950 a person could not quite a job without police and state security agency permission. It was simply compulsory to work at the job one had been assigned to. Now although it is true that foremen assign a Soviet their working assignments the bidding of any worker who cannot be replaced. In the event a worker does not choose to remain at his place of work or chooses to refuse a certain job he can be tried by a people's court and sent to a work camp or prison for terms ranging up to 3 years.

The headquarters of the Central Committee of the KPB is located on Karl Marx St. a 8 storied yellow masonry and brick structure. It is a rectangular shaped with straight sharp lines and almost none of its gables. Decorations found on most buildings in the city. The first Secretary of the Central Committee of the KPB by Petrovich was the wingman of the Central Committee, which was in the late 50s. K. P. MARSHALOV, only seen on the streets. He and his family occupy a huge 8 room apt. on the top floor of a government apartment house on prospect Stalin, entrance to this apartment building is guarded night and day by one uniformed policeman who checks papers and stops unauthorized persons out. Next to him is the residence of several ministers, such as, Minister of Education, 14 S. Prospekt and Minister of Construction, 24 S. Prospekt. Majorov controls and holds all activities in the republic with authority, no United States government has been enjoyed, since the authority cannot be exercised or challenged by court order or injunction, as it often is in the United States. Majorov is responsible himself to the masses and the party, perestroika decided by Khrushchev. He appeared in the reviewing box at the parade of his troops on May 10 and November 7th, holidays, besides, which he works a congenial head, occasional without others of a small. He was elected to his post in a general election, more than 14,000,000 in votes to the end of 1980, but after appointed from the members of the Supreme Soviet, who are elected on the one candidate ticket, which is prepared and authorized in the first place by the United Com. of the Communist party of the Republic's Republic's, therefore is common. prefabricated parts for speeds the roughly and in preparation  
Khrushchev called a halt to the construction plans of the  
present 7 year plan, this will mean, especially, on apartment,  
for without these no a dies need.

Most factory workers do not consider themselves in this  
for an apartment even if they get on it but for at least  
4 years. This estimate are based on experience.

At the 22nd party congress Khrushchev in his  
speech, for with speed, for all practical purposes the  
only speech, said all other policies in favor of the  
first speech, recalled that in 1940, 100,000 people  
in the Soviet Union went abroad, this is a gross  
over estimate including foreigners and returning  
and abroad which make up 20-25 of this total  
all other are delegations of intellectuals, students  
and scientific workers the 250,000 tourist "Kudoko"  
manage to go abroad are carefully selected from  
applicants, the main requirement is, is he loyal  
and politically responsible?? any worker at our plant  
could apply for a tourist trip under the limited  
months under applying to delegations for 140 rubles  
he can go to China for two weeks from which  
or for 80 rubles up to Czechoslovakia for more  
if he passes the requirements he can even get to  
England, the hotel go that he must be checked  
by the Communist Party, he must account for the proceeds  
of his money, since speculation is not allowed  
the USSR he must have behind close relatives, preferably  
a wife and children, or mother and father, this  
last is actually the most important, the Russians  
know that a person will not ordinarily leave  
a delegation or group of tourist to seek anyone  
if he knows he'll never see his family again  
not alone anyway. Individual tourist who go abroad  
when and where they want to, because of their own desires  
are unknown in the Soviet Union. Passports abroad  
are issued only after a 6 month department investigation  
by the KGB.

The rest of the project for 10 remaining dollars is  
incurred with the no smaller square <sup>roughly</sup> 5 stories  
apartment house, it may be said that at 10 present time  
60% of all living in an apartment in 10 years 7000  
all living quarters will be in these many stories barracks.  
The building ~~price~~ price is in full swing although  
at the 22nd Congress. Another movement that is now  
building projects were started in 1888-1890 that for a  
year after the finish of the Congress only special projects  
project will be allowed to be begun in order to give a chance  
to the completion of cities already started, this is not  
the only reason, for the kind of new materials and
